

### SPECIAL PRODUCTS

#### NEW CRANE LUBE WHS 2002

For use in tough operating conditions where corrosion protection and water resistance is essential. Extreme pressure high performance grease for plastic/plastic and plastic/metal applications. Use on mechanical handling machinery and plastic crosshead guides on telescopic cranes.

Available in 500 gm cartridges and 12.5 kg kegs.

#### NEW HAMMER DRILL GREASE

Extreme pressure grease for use in jack hammers. Will operate under stop-start or continuous conditions, at temperatures of 160°C and above.

NOTE: 500 gm cartridges require a heavy duty Reiner grease gun – ask your distributor for details.

### METAL WORKING

#### EASI-CUT

Drilling and tapping made simple with solid (EASI-CUT PASTE) and liquid (EASI-CUT FLUID) versions, each containing EP and other additives to ensure that even 'deep hole' drilling is problem-free. Both products provide lubrication and penetration at the cutting edge of the drill flutes.

Available in 400 ml aerosols, 500 gm tube and 250 ml bottles.

#### ANTI-SPATTER

When spray applied to a surface prior to welding ANTI-SPATTER ensures the easy removal of weld spatter from the surface. The sprayed film can be readily removed with a solvent cleaner leaving the surface ready for painting if required.

Available in 400 ml aerosols.

#### CRACKSEEKER PENETRANT, DEVELOPER & CLEANER

The ideal NDT solution for determining micro cracks in metal.

### SILICONE LUBRICANTS

#### SILICONE LUBE PLUS

A multi-functional silicone spray which can be used for lubrication of plastics and elastomers (including rubber) and also as a mould release coating for use on all types of plastic moulds.

Available in 400 ml aerosols.

#### EASI-GLIDE LUBE PLUS

Provides a dry thin film of PTFE where ease of movement is required in plastic to plastic contact applications.

Available in 400 ml aerosols.

### REINER GREASE GUN

For simple, clean and accurate lubrication of high quality machines with long lubricating lines, large quantities of lubricant per stroke. Maximum operating pressure: 400 bar.

Also available is the single-handed Reiner grease gun which operates at pressures up to 150 bar.

DISTRIBUTOR

*If you have a lubrication problem that is not covered in this brochure, please provide your distributor with application details and we will be pleased to make a recommendation*
